DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement has been received and considered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 8- rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 8 the limitation "... the pressure required to execute a parking brake operation is built up more slowly in the wheel brakes associated with the second axle than is the case with an actuation of the operating element over a long period of time." is not understood. Specifically, the comparison between the first and second operations is not understood.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over of WO 02/090159 (WO '159) for which U.S. Publication to Kley et al. '481 is relied upon for a translation in view of Kubota '414.

Regarding claims 6-10 WO '159 teaches a brake system that is used for holding a vehicle on an incline by metering the pressure into the wheel brakes.

Lacking in WO '159 is a specific reference to driving the pump so that the pressure increase gradient is kept to a minimum during parking situations.

Kubota discloses a brake system capable of controlling a pump for the optimum rate of change of brake cylinder pressure.

It is notoriously well known in the art that pump noise due to rapid pressure increase requirements can often be irritating to the vehicle driver and therefore a problem to be avoided.

Therefore, one having ordinary skill in the art would have found it obvious to have controlled the pressure increase gradient of the pump of WO '159 to the brake cylinders to be kept to a minimum level (as could be dictated by the degree of incline of the hill) when stopping, or parking, the vehicle of WO '159 on a hill-- or to limit the amount of pump noise.

Conclusion

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please review the references to Harris and Ohkubo et al. and Itoh et al.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 571-272-7123. The examiner can normally be reached on M-F 10:30-7:00.

Application/Control Number: 10/552,687 Page 4

Art Unit: 3683

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rob Siconolfi can be reached on 571-272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
